

Bug-Proof Lesson Plan

| | |
|---|---|
| YOUR NAME: | Tyler Creasy |
| Pick a lesson from your unit in Dr. Grace's class. Write a short summary of that lesson plan. Be sure to describe what technology you plan for your students (and you) to use: | Students will be creating a Prezi to show their knowledge of the content by describing methods of genocide. I will also be using my laptop and projector to give notes. |
| <i>GNAT</i> | |
| Look at the class list of possible problems and pick one (or make up your own) that is something that is a temporary problem/issue that could happen to your equipment (the teacher's computer) that would affect your plan. The technology might get fixed before your lesson is over, but might not. What "bug" did you pick: | Projector won't work |
| What could you do that would allow the learning to continue without the technology or in a modified way? | I would send the notes to all of the students so they would have them and I would also send them any activity. We would still go over everything that we would have on the screen but this is just more personal on their laptop screens. |
| What do you need to do ahead of time so that plan could be carried out? (Do you need handouts? Other materials? ...) | I need to make sure that I have the notes in a format that all of my students have and I will need to have paper copies for any students who do not have their laptop or use of it. |
| <i>BLACK FLY</i> | |
| Look at the class list of possible problems and pick one (or make up your own) that is something that is an all-day problem/issue that could happen to you or your students' equipment that would affect your plan. What "bug" did you pick: | Laptop won't work or is updating |
| What could you do that would allow the learning to continue without the technology or in a modified way? | I would have paper and pencil activities to do with the students while we wait for my computer to work or to do all class. I will have the notes on overhead sheets as well and can use an overhead machine (if those still exist). |
| What do you need to do ahead of time so that plan could be carried out? (Do | I would have pencils in my classroom for students who do not have any and I would |

| | |
|--|--|
| you need handouts? Other materials? ...) | print off worksheets for us to work on and maybe a game like bingo. |
| <i>DEADLY ASIAN HORNET</i> | |
| Look at the class list of possible problems and pick one (or make up your own) that is something that is a multi-day problem/issue that could happen to you and your students' equipment that would affect your plan. What "bug" did you pick: | Internet stops working |
| What could you do that would allow the learning to continue without the technology or in a modified way? | I would have blank templates made up for students so we can still make a presentation like the Prezi but with paper. All of the students should have the notes and will not need to do research. |
| What do you need to do ahead of time so that plan could be carried out? (Do you need handouts? Other materials? ...) | I would need to print off templates and bring blank pieces of computer paper for people who want to draw their own templates. I will always have extra copies of the notes or have them on a flash drive so I can give them to students who need them. |
